## RSGB Visit

TARG were delighted to welcome Peter G0DZB and Vic G6BHE from the RSGB as guest speakers at our 6th July meeting. A good exchange of views - which is what consultation is all about.

## Autographed Editions

Great to see a two page article in this month's RadCom featuring Mark M0IEO's Satellite Talk and Field Day. A variety of club based events and field based events is a follow up to discussions within the committee.

## CW Boot Camp

EssexCW are repeating their successful one day "Boot Camp" on Saturday 27th Oct in Witham (half way between Chelmsford and Colchester). To secure a place booking is essential. Contact Andy:

[g0ibn1@yahoo.com](mailto:g0ibn1@yahoo.com)

## Visual Impact

TARG have completed a number of projects to promote the hobby and the club:

- Belinda M6JNX ordered two 'easy to get in a photo' posters (see above).
- We emailed 20 local non-radio clubs offering a talk on amateur radio.
- Check out our First Edition 10 slide Power Point presentation, viewable via YouTube, on the home page of our website\*

\*Big thanks to Debs 2E0PTD and Daniel 2E0DUC for the voice over - it makes all the difference.

## This Friday - 20th July

8pm: TARGet Nite - Hand's On Radio. The current format of "bring and tell" is working as members focus on the topic that interests them. These sessions are useful if you are "stuck" as someone will know the answer or show you what to do. Remember HF and VHF antennas are available on site.

## No Contingency for Rain

Rain wasn't an issue on the 15th July Field Day at Two Tree Island; it was the sun! The event was well attended with 20+ visitors during the day that started with a BBQ thanks to John M0LFX.

Gary M0ICG (below) used 6m and had a QSO with Hungry. Other modes were HF taking advantage of the salt water, DMR and VHF.

For full report on the day, see the "News Page" of the website.
