6 More M6s

The month started with 6 passes at Intermediate, and finished with 6 passes at Foundation. Well done to all the candidates and to the Trainers and support volunteers who gave up their time to help bring new people into the hobby.

Petition

Vote for a debate on whether Radio Amateurs should be exempt from planning permission:

<https://petition.parliament.uk/petitions/202179>

Thanks to Dean G4WQI (right in photo), Chair of EssexCW, guest speaker for June who explained how different antennas affect the ability to DX. The following Day he and others took part in a National Contest working portable.

Talk to the Sky

The Satellite Field Day at Hadleigh Country Park was well attended to see the theory put into practice. Several QSOs made via the 6 fly-bys during our visit.

The event was advertised at the park facilities - spot the poster!

Next Speaker

TARG are delighted to welcome RSGB representative Keith Hayes, G3WRO, as our guest speaker on 6th July at 8pm. Keith has his finger on the pulse of many aspects of amateur radio. There will be a summary of radio past and present, the role of RSGB and open forum for questions.

GB2MFM

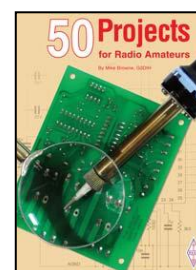

Several of us visited Wat Tyler Country Park for repeater tests in preparation for our field day in Sept. Jenson (below right), who recently passed his Foundation, will be bringing the Clansman army radio as there is a military theme.

DMR Q&A

TARG have a specialist DMR speaker at the Sept meeting, but let's use TARG et Nite to test what can be done when there is a group of us together (eg Two people on a 'private call', can a third listen in?)
